Digibank Malaysia Project – Senior Product Management Leader – Lending

Description

GXS Bank is a brand new team formed to build out the digital bank.

As part of the Product Team, you will lead some of the highest impact, strategic projects. You'll be responsible for raising the bar, delivering projects that require complex stakeholder management and coordination across multiple cross-functional teams. You will have the opportunity to help define the overall digibank product strategy as GXS progresses from application to launch and beyond.

GXS likes creative hustlers, people who can think outside the box, motivate and get stuff done even if it seems impossible. GXS people work fast, push the boundaries, try new things and sometimes they don't work, so in GXS the people embrace failure and lifelong learning.

Responsibilities

- 5+ years experience as a product manager with a tech software company.
- A degree in computer science, software engineering, information technology, business, finance, economics or related fields.
- Demonstrable success in launching new products or features with clear metrics and impact; ideally in a fintech, ecommerce or startup environment.
- Healthy blend of strategic thinking capabilities with An innate “dream big, start small” mindset and an eagle eye for detail.
- Empathy for users and a drive to discover and resolve their pain points.
- An analytical and a data-driven approach to problem solving.
- An owner's mindset – you don't shy away from the hard stuff.
- Passion for building delightful product experiences.
- Excellent communication and presentation skills with an ability to quickly command trust and respect from executives and partners.
